

LSFS10 SKIDSTEER MULCHER

∅ 30cm

When it comes to clearing large areas with overgrown vegetation, to reclaim land or to tackle a forestry job, skid loader mulchers are often the preferred option. The skid steer is a fast, strong but relatively light machine, especially if compared with a tractor. Skid steers can reach places and do jobs that would otherwise be labour intensive. Hydraulic hoods, fully openable for higher cutting capacity. Piston motor option.
