

# LSFS5 SKIDSTEER FLAIL

Y Blade  $\varnothing$  6cm

Hammer  $\varnothing$  8 cm

When it comes to clearing large areas with overgrown vegetation, to reclaim land or to tackle a forestry job, skid loader mulchers or flails are often the preferred option. The skid steer is a fast, strong but relatively light machine, especially if compared with a tractor. Skid steers can reach places and do jobs that would otherwise be labour intensive. Mechanical side shift (hydraulic side shift available as an optional extra). Piston motor option.
